Labelling

Preprocess UCAR data with a CNN classifier trained on Lisa data
Handle wrong cases by hand

Results

I get total 27755 traffic lights from ucar dataset.

class id	0	1	2	3	4	5	6	7	8
class tag	Not a TL	go	go forward	go left	stop	stop left	warning	warning left	mult TL
number	458	12546	754	367	11547	957	551	53	251

findings

wrong labeling in our data

Car or ped are labelled as traffic light.

1. TLs are hard to label at night.
